## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

### *Formula of Claim 1*

- I. Claims 1-18 are drawn in part to compounds and compositions as set forth in the formula of claim 1 where X, Y and Q are nitrogen and Z is carbon, classified in class 544, subclass 322.
- II. Claims 1-18 are drawn in part to compounds and compositions as set forth in the formula of claim 1 where X and Y are nitrogen, Z is carbon and Q is a chalcogen, classified in class 544, subclass 298.
- III. Claims 1-18 are drawn in part to compounds and compositions as set forth in the formula of claim 1 where X and Q are nitrogen and Y and Z are carbon, classified in class 546, subclass 223.
- IV. Claims 1-18 are drawn in part to compounds and compositions as set forth in the formula of claim 1 where X is nitrogen, Y and Z are carbon and Q is a chalcogen, classified in class 546, subclass 236.

- V. Claims 1-18 are drawn in part to compounds and compositions as set forth in the formula of claim 1 where X, Y, Z and Q are nitrogen, classified in class 544, subclass 194.
- VI. Claims 1-18 are drawn in part to compounds and compositions as set forth in the formula of claim 1 where X, Y and Z are nitrogen and Q is a chalcogen, classified in class 544, subclass 219.
- VII. Claims 19-50 are drawn in part to methods regulating the activity of lysophosphatidic acid acyltransferase with compounds and compositions as set forth in the formula of claim 1 where X and Y are nitrogen and Z is carbon, classified in class 514, subclass 247.
- VIII. Claims 19-50 are drawn in part to methods regulating the activity of lysophosphatidic acid acyltransferase with compounds and compositions as set forth in the formula of claim 1 where X, Y and Z are nitrogen, classified in class 514, subclass 241.
- IX. Claims 19-50 are drawn in part to methods regulating the activity of lysophosphatidic acid acyltransferase with compounds and compositions as set forth in the formula of claim 1 where X is nitrogen and Y and Z are carbon, classified in class 514, subclass 277.
- X. Claims 51-59 are drawn in part to a coated medical device for inhibiting the proliferation of a cell by regulating the activity of lysophosphatidic acid acyltransferase with compounds and compositions as set forth in the formula of claim 1, classified in class 623 and various subclasses therein.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. For example groups I-VI differ from groups VII-X because the compounds found within these groups have differing chemical cores as demonstrated by the classifications above. Groups VII-IX differ from Groups I-VI and X because these groups are drawn to methods of use related to regulating the activity of lysophosphatidic acid acyltransferase. Still further, Groups X differs from groups I-IX because this group is drawn to coated medical devices whereas the other groups do not pertain to any type of medical device. Applicant must pick an invention from the ten groups above.

Claims 1-59 are generic to a plurality of disclosed patentably distinct species comprising compounds with relating to the chemical core of the formula found in claim 1. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

A telephone call was made to Richard Sharkey on August 29, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
